Sites Notification Section
Chicago, Illinois 60604

Gentlemen:

Enclosed are three notification forms EPA 8900-1 for our facilities as required by Section 103 (c) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980.

One form covers former oily waste pits at our Alma, Michigan Refinery (MID 005358130). These pits were previously emptied of oily wastes and the material soil farmed on our land treatment site. The remaining residue will be removed and disposed in the same manner.

Another form for a former refinery site in Mt. Pleasant, Michigan is provided but may not be required. Clean-up and recovery of oils is continuing under direction of the Michigan Department of Natural Resources. Samples tested indicate the oily material at this site is not hazardous waste under RCRA.

The third form covers a former refinery site in Alma. Oily materials left from the 1966 shut-down are being removed for land farm treatment at our active facility. This operation is also under direction of the Michigan DNR and your Grosse Ile office.

Please contact me if you have any questions.

Very truly yours,

Patrick A. Lincoln
